

# How to Care for Your Mask

**WEAR YOUR MASK IN COMMON AREAS AT ALL TIMES WHEN NOT ACTIVELY EATING OR DRINKING. As soon as you are done with these activities, place your mask back on.**

Limit the number of unmasked individuals who are in close proximity with one another while eating and drinking, including in: break-rooms, cafeteria, workrooms, courtyards, workstations, recreational facilities.

Wash your hands before and after touching your mask.

Store your mask in a paper bag when necessary to remove it. Wash and dry your mask at the end of the day.
